Service Consultant Training

60-hour Comprehensive Program

Course Outline

Course Overview

The Alderson Service Consultants Guild is a comprehensive in-dealership training program designed for service consultants within the automotive dealership. The training focuses on four key pillars of the modern service department: communication, customer satisfaction, professional selling and objection-handling. Rather than reinforcing basic principles, we analyze the science and statistics behind effective work methods in order to shed light on the “why” and “how” versus merely the “what”. An examination of available data highlights the differences between effective and ineffective strategies across the four pillars: communication, sales, customer satisfaction and objection management.

Conventional practices and methodologies in service are becoming obsolete in today’s automotive industry, with new dynamics creating an urgent need for new adaptive skillsets and workflow patterns. This training program aims to establish a strong foundation for navigating with these dynamics.

Alderson Service Consultants Guild Mission

With the Alderson Service Consultants Guild, our mission is to provide a service experience that will consistently surpass customer expectations through a team of highly qualified, competent, and certified dealership service professionals.

Our Approach to Learning

Because of the impact of competition on variable operations, fixed operations have become the focal point for dealerships. A dealership's ability to generate business will determine whether it stays a winner or becomes a loser in the automotive industry. The only way a dealership can survive in this context is to change its **work methods**, its **approach** to customers and especially its **perception** of service. Success also depends on the dealership's ability to provide customers with a product or service that meets their needs perfectly.

Throughout the Alderson Service Consultants Guild training, data and statistics will be provided to help you appreciate the urgent need for the automotive industry to change its work methods, understanding the need for change and how to effect change that is a challenge for everyone.

In the years ahead, the successful service departments will be those that strive to go beyond meeting customers' needs by surpassing their expectations.

Training Format and Hours

This program is delivered via a combination of in-person and online (Zoom-based) sessions, and includes 60 hours (eight full days) of instructor-led training. Training days are scheduled in advance and arranged non-consecutively so as not to disrupt business operation. This allows students to absorb the material and gather feedback for their instructor in advance of the next training session, resulting in a more effective application of skills.

- ◆ Total program duration is 6-10 months depending on the frequency of training days (determined in advance according to staff availability and individual learning preferences).

Each training module incorporates assignments, roleplay exercises and quizzes that are conducive to effective learning. Worksheets, learning plans and other materials are provided to the students in advance of each training module.

Upon successful completion of all four training modules and associated exercises, participants are awarded a *Service Consultants Guild Certificate*.

Tuition

The tuition fee for the Service Consultants Guild Training Program (60 hours) is \$13,500 per person.

- ◆ Worksheets and other course materials are included in the training price. Prices are quoted in Canadian dollars.
